

1

Check each hoof for signs of hoof erosion and inter-digital sores.

Before application trim hooves as required.

2

3

Ensure all under-running horn is removed, clean the hoof and the inter-digital space.

Pay particular attention to drying any sores (scald or strip)

4

5

Apply Teisen Hoofcare Gel with the brush provided. Allow the animal to stand on clean, dry ground for 1 to 2 minutes.
